

EZZY WAVE

Over 40 Years of Wave Sailing

David Ezzy shaped the first Ezzy Wave in 1983 and since then it has been relentlessly refined for strength, control, and handling in the world's heaviest wave conditions.

Proven at Hookipa

Hookipa's big surf, sharp reef, and gusty trades are the ultimate test. The Ezzy Wave is light in the hands, tough in the wipe outs, and balanced in the turn.

Key Features

- Power & Stability – Reduced luff curve drives forward and stays steady in light gusts.
- Smooth Handling – Pulled-back battens make depowering and flipping effortless.
- Balanced Feel – Extended clew on small sizes for stability in jumps.
- Bombproof Build – Dyneema X-ply and strong scrim yarns: lighter weight, longer life.

Rigged and Ready

Every sail is rigged and calibrated in our factory, with downhaul settings measured on a load cell for precision you can trust.

40 Years On

From mast-high walls to mellow home breaks, the Ezzy Wave delivers the control, power, and durability that riders have trusted for over four decades.

RIGGING SPECIFICATIONS WAVE 2026

SIZE	LUFF		BOOM		EZZY MAST		Weight
	Min	Max	Min	Max	Bottom/Top	Battens	
2.8	325	329	127	137	315 / 340	4	2.30
